MITCHELL'S World Famous SHOOTING GLASSES

Made in the U.S.A. by Optical Experts devoted to the Shooter, his Visual Shooting Problems and the Protection of his Eye-sight.

- ★ All Lenses Safety-Hardened to withstand greater impact.
- ★ MITCHELL'S Yellow — for maximum contrast of target, filters out harmful ultra-violet glare. Also excellent for night shooting or night driving. Light Transmission 92%.
- ★ Made exclusively for Shooting conditions. Light-weight frames give maximum vision and safety. Can be worn comfortably under ear-muffs.
- ★ Finest precision ground, optically perfect lenses used in Mitchell's Glasses, completely distortion free.
- ★ Mitchell's Shooting Glasses make vision sharper at any time and under any conditions. Especially under adverse conditions — such as low illumination, haze or fog. Even in the brightest sunshine you are able to see more sharply.

Whatever type shooting you do — target, competitive or hunting — you will find that you are able to improve this shooting by the use of MITCHELL'S SHOOTING GLASSES.

When ordering, please enclose cheque or money order. Price includes leather case (except No. 3). Please include 25c. postage. Dealers inquiries welcome.

Australian Agents and Distributors — (Queensland excepted)

BULLS-EYE!

★ THE STAR PROGRESSIVE RELOADING TOOL FOR PISTOL AND REVOLVER

\$260.00

OPERATION
In the PROGRESSIVE RELOADING TOOL a complete reload is made in one stroke of the hand lever and by handling the shell only once. In stability of continuous operation it is unsurpassed by any loader in the field. The powder carrier has passed the closest inspection and throws as accurate a charge as can be metered. All tools and dies are adjustably mounted in a tool head, performing their operations on the shells in their respective positions simultaneously. Its name, PROGRESSIVE RELOADING TOOL, is derived from its method of operation, progressively reloading shells from one stroke of the hand lever, a complete load to each stroke.

★ THE STAR LUBRICATOR AND RESIZER

\$62.50

RESIZING AND LUBRICATING IN ONE-THIRD THE USUAL TIME.

OPERATION
This lubricator embodies a newly perfected method of lubricating bullets; is substantially and carefully built and is accurate and positive in its operations. A storage pressure system is used in the grease reservoir, by means of a compression spring, which feeds the grease to a high-pressure pump which automatically forces the lubricant into the grooves of the bullet. The bullet is then forced through the die by the entering of the next one.
One setting of the pressure screw greases from 100 to 200 bullets. The bullets being forced on through the die makes this tool about three times as fast as the ordinary lubricator.
This tool is becoming as famous as the PROGRESSIVE RELOADING TOOL among shooters for its accuracy and speed. It is equipped with hardened dies and is adaptable to any caliber. It is sold on a money back guarantee if not satisfactory after a week's trial.

too good to miss

The choice of Gold Medal winners at Wiesbaden is also the choice of New South Wales Pistol Shooting Champions. Since 1960, the N.S.W. Rapid Fire Championship has been won with R.W.S. ammunition.

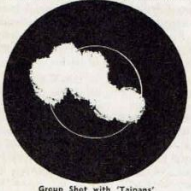

Top shooters in N.S.W. know that accurate reliable performance wins.

With the nickel plated brass case and individual ammo-pack slide out container, R.W.S. .22 cartridges are too good to miss.
