AT LAST . . .
a completely new concept in Target Pistol Design . . .

THE ALL NEW "DOMINO"

MOD. 602

The Domino is not just a rehash of traditional designs with a few new ideas, but a pistol that has been designed from the ground up. The designers studied what you, the pistol shooters, required in a standard handgun, added new and revolutionary ideas, and came up with the most advanced and accurate standard handgun in the world today.

The manufacturers are so confident that a 5 year warranty is granted against factory defects and deterioration.

The features of the "Domino" are too numerous to fully mention them but we can say that there is practically nil recoil due to a system of shock absorbers, the magazine inserts from the top, trigger mechanism is fully adjustable and removable to mention a few.
