Ipswich Pistol Club

Mt Isa Pistol Club

Top left: Angle shot of end of shooting bays at Mount Isa Pistol Club, showing 25 metre and 50 metre ranges and steel wall behind the back-stop. Top Right: Full view of the precision range showing construction of the shooting bays, concrete block, and the steel benches. Bottom Left: View of the mound of spoil bulldozed out of the hill, showing the shooting bays and storage sheds. An estimate of the amount of rock shifted can be had by the height of the steps leading up from the car park. Bottom Right: The turning targets which were yet to be finished. This too gives some idea of the substantial nature of the whole structure.
