**IMJ 'drop test' practically eliminates misfires!**

A misfire can be very frustrating, the shattering sound of a disheartening 'click' and away goes your target or game. We 'drop test' every batch to ensure absolute consistency in priming compound.

In this quality control test, a steel ball is dropped from a pre-determined height representing the minimum firing pin impact... and...

**if they don't go 'Bang' they're out!**

IMJ Australia's biggest selling cartridges.

**It's good common sense:  
When you see more clearly  
you shoot more accurately!**

The sharper, clearer vision with Stirling shooting glasses will surely lift your score because they contrast your target against the background. The extra large lenses give undistorted vision from centre to edge, and properly fitted Stirling glasses won't fog or obscure your vision because they ride high on the face.

**YELLOW LENS:** For medium to poor light conditions, they brighten the background yet accentuate the black. The difference is amazing, look for yourself.

**GREEN LENS:** These eliminate the glare and squinting caused by bright sunlight, keep your eyes fresh all day and contrast black against white.

**SHOOTING GLASSES \$11.00 PAIR**

Shoot better and save money with Stirling .22 ammo, loaded with super clean Hercules powder. Look for the gold pack costs 89c per 50 blt. Test some soon.

**Let's talk again about bullets.**

If you are already a good shooter you have experienced this ammunition — it's one of the best in the world.

But we want to talk to the young shooters — to assure them that there is nothing better. You can forget about Dynamit Nobel Ammunition as long as you have loaded your weapon with it.

Concentrate on yourself, and your know how.

You can rely on these bullets — that's certain.

by **EAGLE EYE**

The Hammerli 120 has at last reached the Australian market and we were privileged to test this model recently.

The balance of this pistol is very satisfactory and the shooter is able to complete the international course of 60 shots without undue fatigue. The trigger is a delight to use being a two stage type with a very light second stage. Lock time is extremely fast and the manufacturer claims it to be 0.0018 sec.

The 120 fills a gap in the market for the shooter who does not wish to invest a large sum of money in one extremely specialised piece of equipment for the slow fire 50 metre match.

For the competitor who concentrates on other events, but for aggregate matches, must shoot 50 metres, then this pistol is an excellent choice. The shooting techniques required are compatible with those used in centre fire, standard and air pistol matches where trigger control is of paramount importance. The specialised art of using a set trigger is not essential with the model 120 and yet scores of 540 plus can be anticipated.

**Specifications:**

Barrel length — 254mm. Weight — 1250 grammes. Overall length — 375mm. Sight radius—370mm or 250mm (adjustable). Sights —Front—Post 3.5mm interchangeable with model 106 (3.2mm, 3.8mm, 4.00mm).
